Dubai (UAE)

Rehabilitation course for ITIL certification

REF: E6112 DATE: 17 - 21 November 2019 Venue: Dubai (UAE) - Fee: 2500 Euro

Overview:

This course immerses learners in the overall concepts, processes, policies and methods associated with the Service operation phase of the service Lifecycle.

The course covers the management and control of the activities and techniques within the Service Operation stage, but not the detail of each of the supporting processes. This course is designed using an engaging scenario-based approach to learning the core disciplines of the ITIL best practice.

After completing the course, the participant will receive a certificate of attendance from the EuroTraining Center

Target groups:

The Service Operation Lifecycle course will be of interest to:

- Individuals who have their ITIL Foundation Certificate or the ITIL v2 Foundation + Foundation Bridge certificate who want to pursue the intermediate and advanced level ITIL certifications.
- Individuals who require understanding of the ITIL Service Operation phase of the ITIL core lifecycle and how it may be implemented to enhance the quality of IT service provision within an organization.
- IT professionals working in or new to a Service Operation environment and requiring a detailed understanding of the concepts, processes, functions and activities involved.
- Individuals seeking the ITIL Expert certification in IT Service Management for which this qualification is one of the prerequisite modules
- Those seeking progress towards the ITIL Master in IT Service Management for which the ITIL Expert is a prerequisite
- A typical role includes but is not restricted to: CIOs, CTOs, managers, supervisory staff, team leaders, designers, architects, planners, IT consultants, IT audit managers, IT security managers and ITSM trainers involved in the ongoing management, coordination and integration of operation activities within the Service Lifecycle.

Objectives:

Upon completion of this course the learner will gain competencies in:

- Understanding Service Management as a Practice and Service Operation principles, purpose and objective.
- Understanding how all Service Operation processes interact with other Service Lifecycle processes.
- The subprocesses, activities, methods and functions used in each of the Service Operation processes.
- The roles and responsibilities within Service Operation and the activities and functions to achieve operational excellence.
- How to measure Service Operation performance.
- Understanding technology and implementation requirements in support of Service Operation.
- The challenges, critical success factors and risks related with Service Operation.
