Maintenance Audit and Site Inspection

Maintenance Audit and Site Inspection

Introduction:

Asset & Maintenance Management can deliver a major contribution to the return on investment and output of a company by realizing the best balance between realized performance availability, reliability, risk safety, image, compliance, and cost. We can only do that by making sure that our maintenance process is as effective and efficient as possible. But how to do that in daily hectic practice?

Therefore, it is essential that asset & maintenance managers strive toward the implementation of maintenance best practices. And have insight into the possible performance gaps and how risky they are.

Maintenance Audits & Site Inspections are key enablers to identify performance gaps and hidden improvement potential with which you are able to realize higher performance against lower cost. Acquiring strong audit and assessment techniques is essential for every successful asset & maintenance manager.

This highly-interactive GLOMACS Maintenance Audit and Site Inspection training seminar enable you to develop a powerful vision for asset & maintenance management improvement and improve your abilities to successfully promote and adapt changes in the workplace. You will learn how to apply several audit & assessment techniques to assess asset & maintenance management maturity and identify performance gaps. You will learn how to relate the assessment results to external benchmarks like PAS 55 and ISO 55000. You will understand how to transfer the assessment results into an action plan that improves the business continuity of the organization.

This training seminar will highlight:

- Developing a powerful vision for maintenance improvement
- How an audit fits in the asset management framework
- Overview and practical application of maintenance audit techniques
- Usage of international benchmark standards PAS 55 & ISO 55000
- How to transfer assessment results into a concrete action plan for improvement
