Certified Scrum Developer

Certified Scrum Developer

Introduction:

Certified Scrum Developer CSD is a certification program that is designed for software developers who work in Scrum teams. This certification validates the developer's knowledge of Agile and Scrum principles, practices, and frameworks. This 5-day training course will provide participants with a comprehensive understanding of the Scrum development process, along with practical examples of how to apply Scrum principles in software development.

Course Objectives:

By the end of this course, participants will be able to:

- Understand the basics of Agile and Scrum
- Work in a Scrum team as a developer
- Apply Agile and Scrum principles to software development
- Use best practices for Agile testing and quality assurance
- Apply Scrum principles to continuous improvement and delivery

Targeted Audience:

This course is designed for software developers who want to learn about Scrum and Agile principles and practices, including developers, testers, quality assurance professionals, and project managers.

Course Outlines:
