€TRAINING

Conference: Marine Salvage

Conference: Marine Salvage

Introduction:

This course in Marine Salvage is a practical guide to all the various aspects involved in a professional salvage scenario. It covers the major players in the worldwide salvage industry and links these with a concise summary of the legal and commercial aspects involved in today's modern salvage environment whilst also looking at how salvage has evolved over the years. Salvage contracts in use today are looked at and the future for salvage in the era of ever larger vessels transiting the oceans.

Course Objectives:

At the end of this course the participants will be able to:

- Introduction
- Marine Salvage principles
- The international convention on salvage
- Marine Salvage claims
- Towage and salvage
- Role of the salvage master
- Role of the special casualty representative
- SCOPIC
- Place of safety and re-delivery to the owner
- General average and marine salvage
- Other important roles in marine salvage

Targeted Audience:

- Operation Managers
