Conference: ISO 31000 Lead Risk Manager

Conference: ISO 31000 Lead Risk Manager

Introduction:

Through risk management, decision-making, and performance improvement utilizing ISO 31000 criteria, participants in the ISO 31000 Lead Risk Manager training conference may help a company create and protect value by developing their competencies in these areas. It offers details on the fundamental components, the efficient use of a risk management framework, the use of the risk management process, and the steps required for the proper integration of these components to achieve corporate goals. Additionally, it offers recommendations for the choice and use of methods for evaluating risks in a variety of circumstances.

Participants may apply to sit for the exam and get the "Certified ISO 31000 Lead Risk Manager" certificate after completing the training conference. The certification shows that the holder has the professional skills, theoretical knowledge, and experience necessary to support and direct risk management procedures that are based on ISO 31000 standards and industry best practices.

Conference Objectives:

At the end of this conference, the participants will be able to:

- Show that you grasp the ISO 31000-defined concepts of risk management.
- Establish a risk management structure that adheres to ISO 31000 standards and keeps getting better.
- Utilize the risk management approach in accordance with the recommendations of ISO 31000
- Plan risk communication initiatives as well as systems for recording and reporting risks.
- Based on the results of risk management activities, monitor, review, and enhance the risk management framework and process.

Targeted Audience:

- Risk managers, directors, and officers
- Organizational members who are in charge of creating and preserving value
- Members of top management who wish to receive advice on how risk management should be incorporated at a strategic level
- Accountable parties for risk management procedures
- Those who are interested in risk management
