Project Risk Management & Compliance

Project Risk Management & Compliance

Introduction

This conference will emphasize awareness of project risk management to minimize project cost/schedule overruns & improve project execution.

Project management is all about the management of risks; the ability to seize opportunities, minimize threats and optimize results. However, risk management is too often treated as a reactive process, or worse, not done at all. In this Project Risk Management conference, you will work through the proactive approach to both sides of risk: threats and opportunities. The approach is based on a clear understanding of both qualitative and quantitative approaches to risk management.

Conference Objectives:

At the end of this conference the participants will be able to:

- Get an overview of the Risk Management Process
- Learn to identify risks that affect project quality, time & schedule, cost, and scope
- Learn how to rank risks based on the amount of exposure to the company
- Apply useful techniques to identify, analyze, mitigate and monitor risks in the project life cycle
- Develop the skill necessary to quantify risks
- Learn how to create an effective risk monitoring plan and risk management strategies.
- Use a practical, six-step process to manage project risk
- Develop a risk budget based on expected monetary value EMV
- Examine both the threats and opportunities facing their projects from both a top-down and bottom-up perspective using a proven six-step risk management process.

Targeted Audience:

- Project Owners and Clients
- Professionals whose roles involve leading and directing projects
- Project Managers, Risk Managers and Project Team Leaders
- All Personnel who are involved in carrying out project work assignments
- Project Administrators, Supervisors and Support Staff
- Project Planners, Schedulers, Cost Controllers and Engineers
- Personnel working for project contractors and suppliers
