Financial Analysis Workshop

Financial Analysis Workshop

Introduction:

In today's world, finance professionals are challenged by providing management a detailed analysis of the impact of the organization's financial decisions. Therefore, finance professionals need to be skilled at reading through the numbers on the financial statements, analyzing the figures, interpreting the various ratios, and presenting this analysis in a dynamic manner. This course takes you from the first step of understanding the relationships between the different elements of financial statements, through the process of calculating and analyzing the financial ratios, to the last step of presenting recommendations. While applying Excel tools and techniques, various real-life examples of published financial statements will be used throughout the course.

Course Objectives:

At the end of this course the participants will be able to:

- Apply the framework of financial statements analysis
- Use ratio and financial analysis
- Interpret company financials and industry position
- Appraise the process of company evaluation and analysis
- Analyze real-life financial statements from companies traded on the world and 'GCC' stock exchanges
- Prepare financial analysis template models

Targeted Audience:

Professionals in the field of finance and accounting, financial analysts, department heads, senior management team members, financial controllers, finance managers, and chief and financial accountants who perform business analysis and provide financial recommendations.
