Lead Disaster Recovery Manager

# Lead Disaster Recovery Manager

## Introduction:

Through training as a lead disaster recovery manager, you can gain the knowledge and skills required to assist a company in creating, administering, and executing a disaster recovery plan. You will learn about business continuity management's best practices for disaster recovery processes and ICT disaster recovery services throughout this training course.

## Course Objectives:

At the end of this course the participants will be able to:

- Recognize the connections between business continuity planning, information security, and other IT frameworks and sectors.
- Master the ideas, strategies, tactics, and procedures involved in the creation and efficient administration of a disaster recovery plan.
- Understand how to interpret ICT Disaster Recovery plans in the unique setting of a company.
- Learn how to assist a company in efficiently planning, implementing, managing, monitoring, and maintaining disaster recovery DR services based on best practices.
- Obtain the knowledge necessary to assist a company in putting a best practices-based Disaster Recovery Plan into action.

## Targeted Audience:

- Specialists or consultants in the field of disaster recovery who are aiming to master the relevant ideas and procedures pertaining to recovery techniques
- Establishing a disaster recovery strategy in a business is the responsibility of managers
