Strategic Planning, Management Control &
Effective Budgeting

Strategic Planning, Management Control & Effective Budgeting

Introduction:

As the business environment becomes ever more uncertain and turbulent, the requirement for professional leadership and effective management control throughout organizations is at a premium. Strategic Planning, Management Control & Effective Budgeting is for those who are dedicated to maximizing the performance of their organizations, as well as their value-added contribution and that of the people who work for them. The elements of the course provide a structured, coherent, and comprehensive framework for addressing the challenges which face professionals in respect of both their day-to-day and longer-term responsibilities.

This course will be particularly relevant to those professionals who are involved in setting the direction of the organization or that of their function within it, and are also accountable for the delivery of cost-effective processes, activities, and operations. This course will provide professionals with a comprehensive range of skills essential to effectively leading both people and projects/processes in times of increasing global competition, and where budgets are inextricably linked with strategy formulation, people leadership, and cost analysis.

Course Objectives:

At the end of this course the participants will be able to:

- Develop an appreciation and understanding of strategic planning and management control processes.
- Understand how the elements within them interact to create a systemic approach to the effective and efficient management of organisations, from strategy formulation through to efficient execution.
- Learn how to recognise, manage and mitigate risk.
- Gain awareness of the kind of leadership which really makes a difference in unleashing the potential of everyone in the team.
- Understand the key factors which lead to sustainable business success.
- Think in terms of terms of process-value added to customers/shareholders.
- Integrate the organization's strategic planning with budgets and processes of cost control.
- Understand the importance of project management, appraisal, planning.
- Explore traditional versus innovative budgetary techniques.
- Explore capital and activity-based budgeting techniques.
- Identify key strategic and financial indicators for the business, and how and when to monitor them.
- Discuss the problems and limitations of budgetary control and look for alternative tools.
- Understand the importance of balancing financial and non-financial measure in managing projects.
- Link budgetary processes with quality issues and business process improvement.
- Identify priorities for continued professional development.
