

Seminar: Stakeholder Management

# Seminar: Stakeholder Management

#### Introduction:

A stakeholder is a person, group, or organization that has an interest in an organization because they are affected by its operations or can affect Its operations. Stakeholders have an impact on every organization, public or private sector - some are internal, others are external, but the higher priority stakeholders must be engaged, their expectations understood, and strategies developed, planned, and implemented to recognize and address their concerns. All groups of stakeholders must be recognized and treated equitably, as part of good governance. Stakeholder management involves both hard and soft skills, with some understanding of human nature, culture and communications added, finished off with the ability to influence and negotiate with integrity.

This Stakeholder Management training course will introduce you to the relevant tools and techniques, as well as a leading standard, that will help you to engage and manage stakeholders effectively and efficiently. This will include learning the stakeholder management processes, developing an understanding of human behavior and how to influence it, analyzing and planning communication strategies, as well as using the techniques of principled negotiation and influencing without authority, to achieve your goals. This will be achieved with a mixture of short theory blocks, backed up by many interactive exercises and role-plays, to help you practice your newly learned skills in a safe learning environment.

### Course Objectives:

At the end of this course the participants will be able to:

- · Explain the process flow, the processes, and key documents involved in managing stakeholders
- Describe how to analyze the stakeholder environment, identify/prioritize stakeholders, and recognize their expectations
- · Create and promulgate communications that assist in engaging stakeholders
- Demonstrate an ability to recognize how personality and behaviors give an insight into how to best manage stakeholder aspirations and expectations
- Give examples of different types of culture and the impact it has on your stakeholders worldview
- · Show how to undertake successful negotiations, using principled negotiation techniques

## **Targeted Audience:**

- · Executives and managers
- Junior managers and supervisors
