Energy Management Systems Using ISO 50001

REF: L1493 DATE: 6 - 10 October 2024 Venue: Online - Fee: 2500 Euro

Introduction:

This training program on Energy Management Systems using ISO 5000 provides a clear structure for identifying and then reducing energy consumption in any large business or organization. The focus on reducing energy consumption is now a major international consideration in socially responsible management as environmental and sustainability concerns worldwide look to reduce our human impacts on planet Earth.

Program Objectives:

At the end of this program the participants will be able to:

- Produce an energy policy for an organization.
- Conduct an energy "REVIEW".
- Establish an energy "BASELINE", "PERFORMANCE INDICATORS" and "OBJECTIVES".
- Determine practical energy measurement processes.
- Plan actions to improve energy efficiency and use.
- Understand the importance of management systems in achieving the above.

Targeted Audience:

- Operational Managers.
- Design Managers responsible for New Facilities.
- Project Managers especially those responsible for new facilities.
- Facilities Managers.
- Persons keen to improve the environmental performance of their organization.

Program Outlines:
