Project Management Skills For Contractors

REF: P1201 DATE: 2 - 6 December 2024 Venue: London (UK) - Landmark Office Space Fee: 5300 Euro

Introduction:

The overall aim of this program is to provide participants with the knowledge and skills needed to successfully manage a project executed by contractors throughout its life cycle from initial concept to delivery. Participants in this interactive training program will learn all the critical tools required to perform project plans and develop project budgets as well as techniques needed to communicate and manage contractors during the implementation phase.

Program Objectives:

At the end of this program the participants will be able to:

- Identify the major processes in project management in a related contract framework.
- Outline the major activities, steps, and tools needed to manage a contracting partner who is executing the project.
- Devise the contracting strategy for a project and recognize the main contractual provisions that can affect it.
- Develop detailed project plans to manage contracts and to deal with deviations effectively.
- State different types of contracts and their impacts on the relationship with the contractors.
- Describe the post-award main processes including control techniques, change management, and contract administration.

Targeted Audience:

- Contractors involved in construction, engineering, or related industries.
- Project managers overseeing construction projects.
- Construction supervisors and foremen.
- Construction company owners or managers.
- Professionals seeking to enhance their project management skills in the construction sector.

Program Outlines:

Unit 1:

Overview:

- Definition of a project and project management.
