Microsoft Azure Administrator

REF: B1799 DATE: 9 - 13 December 2024 Venue: London (UK) - Landmark Office Space Fee: 5850 Euro

Introduction

Microsoft Azure administrator often serves as part of a larger team dedicated to implementing an organization's cloud infrastructure. Azure administrators also coordinate with other roles to deliver Azure networking, security, database, application development, and DevOps solutions.

Course Objectives

At the end of this course the participants will be able to:

- Define Microsoft Azure AD concepts, including identities, accounts, and tenants.
- Describe Microsoft Azure AD features to support different configurations.
- Understand the differences between Azure AD and Active Directory Domain Services AD DS.
- Choose between supported editions of Azure AD.
- Implement the Microsoft Azure AD join feature.
- Use the Azure Microsoft AD self-service password reset feature.

Targeted Audience

- Manage identities and governance in Azure
- Microsoft Experts
- Manage Azure Active Directory objects
 - Configure self-service password reset
 - Configure Azure AD join

Course Outline

Unit 1: Configure Azure Active Directory

- Define Azure AD concepts, including identities, accounts, and tenants.
- Describe Azure AD features to support different configurations.
- Understand differences between Azure AD and Active Directory Domain Services AD DS.

- Choose between supported editions of Azure AD.
- Implement the Azure AD join feature.
- Use the Azure AD self-service password reset feature.

Unit 2: Configure user and group accounts

- Configure user's accounts and user account properties.
- Create new user accounts.
- Import bulk user accounts with a template.
- Configure group accounts and assignment types.

Unit 3: Configure subscriptions
