Best Practices in Multi Shift Operations

REF: M2107 DATE: 22 - 26 July 2024 Venue: Dusseldorf (Germany) - Fee: 5940 Euro

Introduction:

The book "Best Practices in Multi-Shift Operations" equips shift supervisors and senior operators for this extremely difficult yet exciting task by bringing together best practices from the top firms and a ton of high-profile case studies. This training program enhances the skills necessary for managing multi-shift operations effectively, and it will show how the top businesses in the world handle 24-hour, multi-shift operations.

Program Objectives:

At the end of this program, participants will be able to:

- Understand the Problems Associated with 24/7 Shift Operation Procedures and Solutions.
- Study tested Best Practices for managing 24-hour shifts.
- Make intershift conversations seamless, and Utilize proper practices when handing over shifts.
- Improve plant capacity utilization and process reliability, and Build the shift team through training and address the requirements of the shift team.
- Recognize the benefits and drawbacks of different shift systems, comprehend the body clock, fatigue, and fatigue prevention.
- Review the instrumentation and DCS operator interfaces, and understand how to prevent potential problems.
- Utilize in-depth, well-known case studies to study occurrences at other plants to make an action plan for ongoing advancement at work.
