IT Service Management: ISO/IEC 20000 Lead Implementer

REF: B2018 DATE: 9 - 13 December 2024 Venue: Casablanca (Morocco) - New Hotel Fee: 4290 Euro

Introduction

Implementing a service management system SMS based on ISO/IEC 20000-1's standards has numerous advantages. The standard includes practices that have been shown to be helpful in the service management industry, the requirements stated in clauses 4-10 allow the organization to establish a structured approach to manage service provision activities and deliver value to its customers, and the standard allows the organization to establish a baseline upon which it can improve. The management system is based on ISO's high-level structure HLS, which allows an easier integration with existing management systems.

The training program aims to give participants a thorough understanding of ISO/IEC 20000-1 requirements as well as best practices and methods for setting up and maintaining the service management system.

You are able to take the exam after attending the training session. You can apply for the "Certified ISO/IEC 20000 Lead Implementer" certification if you pass. The "Certified ISO/IEC 20000 Lead Implementer" credential, which is internationally recognized, attests to your professional expertise in implementing an SMS in accordance with ISO/IEC 20000-1 specifications.

Course Objectives

At the end of this course, participants will be able to:

- Gain a thorough understanding of the ideas, strategies, tactics, and procedures employed in the implementation and efficient administration of an SMS.
- Recognize the relationship between ISO/IEC 2000-01, the ISO/IEC 20000 series of standards, and other ISO standards.
- Acquire the capacity to interpret ISO/IEC 20000-1 standards in the unique context of a company.
- Gain the information and skills required to assist a company in efficiently developing, deploying, managing, monitoring, and maintaining an SMS
- Obtain the knowledge necessary to assist a company in putting SMS best practices into effect.

Targeted Audience

- Managers or consultants concerned with and engaged in a service management system deployment in an organization
- Managers and staff wishing to assist their company in delivering value and fulfilling service obligations
