Fundamentals of Transfer Pricing Strategies

REF: TR1909 DATE: 16 - 20 December 2024 Venue: Kuala Lumpur (Malaysia) - Fee: 5300 Euro

Introduction:

The goal of the Fundamentals of Transfer Pricing Strategies training program helps you to improve the fundamental knowledge of transfer pricing's core ideas and principles among tax, accounting, and finance professionals. It also introduces the connection between transfer pricing and more generally technical tax, financial, and accounting sectors.

Program Objectives:

At the end of this program, the participants will be able to:

- Learn the fundamentals of transfer pricing technology.
- Recognize the significance of the arm's length principle.
- Note the various phases of a typical transfer price study.
- Gain a thorough understanding of transfer pricing, including tax implications and opportunities for multinationals.
- Review the present transfer pricing legal system.
- Keep up with the latest changes in transfer pricing.

Targeted Audience:

- Members of the financial accounting team.
- Finance managers and employees in cost and management accounting.
- Budget supervisors.
- Commercial supervisors.
- Financial commitment and participants in the project.
- Members of the acquisition team and investment analysts.
- Risk managers.
