Conference: Diploma in Port State Control

REF: C1785 DATE: 6 - 17 October 2024 Venue: Dubai (UAE) - Fee: 9030 Euro

Introduction

Shipowners, masters and the flag states are responsible for ensuring that ships comply with the provisions of the relevant codes, practices and legislation. Therefore, ensuring these requirements are met and implemented effectively at sea is in the best interests of all maritime professionals - both on and offshore. Ships that fail to fulfill their commitments contained in agreed international legal instruments and subsequently sail in an unsafe condition, threaten lives as well as the marine environment. Therefore, it is in the interest of all to develop effective Port State interfaces for the sake of safe shipping.

This Port State Control Diploma, shaped by expert knowledge and first-hand experience, has been tailored to educate you on the fundamental components of Port State Control. From SOLAS to MARPOL, ISPS to ISM, this course will benefit the multitude of seafarers by educating you on the legal aspects of Port State Control and offering an insight into the work of a PSC Surveyor.

For shipowners, increasing your knowledge in this area can assist you in reducing the risk of detention, by highlighting the areas in which deficiencies are identified.

Program Objectives

At the end of this program the participants will be able to:

- Be aware of Port state Control
- Have background about Maritime Labour Convention MLC
- Identify Standards of Training, Certification and Watchkeeping
- Become familiar with the legal aspects
- set up an ISPS system
- understand safety construction and condition of the ship

Targeted Audience

Whether you are looking to move into the field of Port State Control, or already work within the industry, this diploma will provide a comprehensive knowledge base for your future career
