Advanced Purchasing Management

REF: L338 DATE: 28 April - 2 May 2024 Venue: Amman (Jordan) - ibis Amman Fee: 3900 Euro

Interview:

This training session is for experienced project managers examines advanced project and program management techniques, building on the basics to help ensure success even for large and risky projects and programs. This program stresses project management processes as an integral part of organizational culture and what senior management must do to support it and make it successful within an organization. This course aligns with the Project Management Institute's PMI® Project Management Body of Knowledge PMBOK®.

Project scope management and stakeholder analysis work continues to improve across the project and program management discipline. Learn the newest tools and technologies for handling stakeholders, and building quality into your project.

Learn the newest concepts and techniques for project planning, estimating, and scheduling. Discover how queuing theory, the Theory of Constraints Critical Chain Project Management, and other advanced concepts can help you develop solid, reliable, efficient and effective project plans.

Continue your development with advanced program risk and uncertainty analysis. Learn strategies for handling uncertainty, discover the network affects of project risks, and discover advanced methods for identifying and qualifying project and program risks.

Course Objectives:

At the end of this course the participants will be able to:

- Improve risk management throughout the project life cycle.
- Track projects with solid metrics, not with speculation.
- Better handling of difficult vendors.
- Improved time and cost estimates for risky and challenging projects.
- Reduce cost and schedule risks using advanced, proven techniques.
- Accurately report progress even on complex and risky projects.
- Improve stakeholder communication and involvement.

Targeted Audience:

- Procurement professionals who are seeking to improve their purchasing management skills.
- Supply chain professionals who are responsible for managing the procurement process for their organization.
- Business owners and managers who are looking to streamline and optimize their purchasing processes.
- Professionals working in industries where purchasing plays a critical role, such as manufacturing, construction, and logistics.
- Individuals looking to advance their careers in purchasing or supply chain management.

- Students pursuing a degree in business, supply chain management, or a related field
