Kuala Lumpur (Malaysia)

International Treasury & Cash Management

REF: F1429 DATE: 25 - 29 November 2024 Venue: Kuala Lumpur (Malaysia) - Fee: 5300 Euro

Introduction:

Treasury management is the management of an organization's collection, concentration, disbursement, investment and funding activities as well as the process of dealing with financial risk issues. The very first function of treasury management is cash management which is the corporate process of collecting and managing cash as well as the use of cash for short-term investing. This makes cash management a key component of a company's financial stability and solvency.

This course provides professionals with an overview of the modern role and practices of treasurers in cash management, cash forecasting, treasury funding and investing. Also, this course discusses the application of the latest technologies to cash management while abiding by a certain set of policies and procedures.

Course Objectives:

At the end of this course the participants will be able to:

- Describe and explain the roles of corporate treasury management and the treasury function
- Apply up-to-date practices covering cash management techniques
- Draft a cash flow forecast and establish cash and loan forecasted balances at specific dates
