Mastering Maintenance Audits

REF: A901 DATE: 29 December 2024 - 2 January 2025 Venue: Dubai (UAE) - Fee: 4400 Euro

Introduction:

Most companies use some form of maintenance auditing - whether it is to achieve some form of accreditation, to prove or improve responsible operations, or simply to reaffirm that employees are performing as expected. Nevertheless, there is a significant gap between the average audits and best-in-class audits. When done properly, maintenance audits can be motivating, informative, and will drive high performance.

This course has been designed to equip participants with the skills they need to design audits and surveys that are relevant and valuable to their businesses, build trust and rapport with site personnel to foster an atmosphere of collaboration and ambition. The course provides alternative methodologies for maintenance auditing to enable participants to deliver the right type of audit at the right time as well as the tools and techniques to ensure they are delivered effectively

Course Objectives:

At the end of this course the participants will be able to:

- Design maintenance audit programs that align to the highest priorities of their organizations
- Understand the principles of maintenance best practice
- Appreciate a range of auditing processes from benchmarking to achieving external accreditation such as PAS 55 and ISO 55000
- Build an in-house audit capability to cover the majority of functions and know when and how to engage external specialists effectively
- Use auditing to launch performance improvement programs and then help them succeed

Targeted Audience:

- Maintenance Managers and Supervisors
- Planners
- Schedulers
- Reliability Engineers
- Project Managers
- Project Engineers
