Leadership and Energy Management

REF: M2350 DATE: 3 - 7 June 2024 Venue: Singapore - Fee: 6325 Euro

Introduction:

The Leadership and Energy Management Training program a program designed to equip participants with the skills and knowledge needed to excel in leadership roles while effectively managing energy-related aspects in an organization. This program combines leadership essentials with energy management fundamentals according to ISO 50001 to create well-rounded leaders who can drive success, efficiency, and sustainability.

Program Objectives:

By the end of this program, participants will be able to:

- Understand core leadership principles and their application in managing teams and projects.

- Develop effective communication skills for leadership and reporting, including dashboards and KPIs.

- Gain proficiency in program and project management techniques.

- Formulate departmental strategies and procedures for optimal performance, including risk management.

- Cultivate leadership speech skills for impactful communication and conflict resolution within teams.

- Master organizing, time management techniques, stakeholder, and vendor management competencies, including energy management fundamentals and ISO 50001.

Target Audience:

- Aspiring leaders and supervisors.

- Mid-level managers.

- Senior executives seeking to refine their leadership and energy management skills.

- Employees responsible for leading teams, projects, and energy management initiatives.
