Advanced Cash Flow & Working Capital Management

REF: F156 DATE: 29 September - 3 October 2024 Venue: Istanbul (Turkey) - Sheraton Istanbul Levent Fee: 5300 Euro

Introduction:

In recent years there has been a growing recognition that, in the long run, effective management of cash flow is more important than profit. Long-term cash flow is the real value of a business. It has also been recognized that there is significant potential for improved financial performance from the more effective management of working capital - both directly from immediate cash gains and reduced net interest costs, and indirectly through its impact on increased profitability and return on capital employed. A key challenge in achieving these performance improvements results from the fact that actual levels of working capital and delivery of cash flow are effectively determined by the day-to-day actions of a great many managers and staff, which in large corporations often run into tens of thousands.

Course Objectives:

At the end of this course the participants will be able to:

- Understand the fundamentals of effective management of cash flow, including the optimization of the level of working capital.
- Develop practical experience of how to manage cash flow and optimize working capital to facilitate such delivery in real-life business situations.
- Increase personal financial skill levels
- Develop confidence through understanding the major drivers of successful financial performance.
- Learn many technical skills, all of which lead to the ability to calculate the required figures and implement them into value-adding business decisions.
- Understand balance sheets and profit-and-loss statements
- Understand the importance of cash as the lifeblood of a business
- Focus on key management areas of inventory accounts receivable, and accounts payable
- Understand how to control and manage the cash flow of a business
- Forecast cash flows and draft a cash budget
- Evaluate projects based on their expected cash flows
- Incorporate risk into financial decisions
