Technologies

1 - 5 September 2024
Dubai (UAE)

Course: AZ-500 Microsoft Azure Security Technologies

REF: B1798 DATE: 1 - 5 September 2024 Venue: Dubai (UAE) - Fee: 5310 Euro

Introduction

This course provides IT Security Professionals with the knowledge and skills needed to implement security controls, maintain an organization's security posture, and identify and remediate security vulnerabilities. This course includes security for identity and access, platform protection, data and applications, and security operations.

Course Objectives

At the end of this course the participants will be able to:

- Manage Azure identity and access
- Implement Azure platform protection
- Manage Azure security operations
- Secure data and applications on Azure
- Manage resource group security
- Configure vulnerability scanning
- Configure subscription and resource permissions

Targeted Audience

- Engineers who are planning to take the associated certification exam, or who are performing security tasks in their day-to-day job
- An engineer that wants to specialize in providing security for Azure-based digital platforms and play an integral role in protecting an organization's data.
- IT professionals who want to become Azure Security Engineers
- IT professionals preparing for Microsoft's AZ-500 exam
