Introduction:

Understanding contract law has become an essential part of conducting our daily business functions. Whether you are in purchasing, contract management, subcontracts, project management, general management, or sales, you are constantly involved with legal and contract principles, sometimes without even realizing it.

Too often the wording used in Contracts is not properly understood by those who are making decisions relating to those Contracts, and non-specialists are reluctant to get involved in the process of drafting and amending the documents which are critical to their company's success. There may also be problems in assessing amendments proposed by the other party, and determining whether these are reasonable, or are eroding your company's position.
