Economics of Labour Markets

REF: F2022 DATE: 20 - 24 October 2024 Venue: Sharm El-Sheikh (Egypt) - Sheraton Sharm Hotel, Resort, Fee: 3520 Euro

Introduction

This course will develop your skills to understand basic theoretical and empirical concepts of labour economics. You will learn why workers in different jobs earn different wages, comprehend the role of education in shaping the distribution of wages, learn about labour mobility and international labour migration, and understand the causes and consequences of labour market discrimination.

The course will develop your analytical skills and allow you to use fundamental mechanisms of labour market theory to derive predictions about effects of changes in labour supply and labour demand on wages and employment. The course will also improve your ability to read and interpret empirical research findings in the field of labour economics.

Course Objectives

At the end of this course, the participants will be able to:

- Develop analytical skills
- Use fundamental mechanisms of labor market theory to derive predictions about effects of changes in labour supply and labour demand on wages and unemployment
- Read and interpret empirical research findings in the field
- Derive basic conclusions regarding a wide range of issues related to labour economics

Targeted Audience

Beginners with some basic knowledge of market mechanisms and some basic understanding of statistical concepts.
