The Advanced Cryptocurrency Trading

REF: B1744 DATE: 21 - 25 July 2024 Venue: Istanbul (Turkey) - Sheraton Istanbul Levent Fee: 5850 Euro

Introduction

In this Advanced Cryptocurrency course we teach you the same Trading Strategies that Traders at the Proprietary Trading Firm Montreal Trading Group have implemented for the company. This course not only includes the material that is required to be successful in Trading but also the way that we interpret the different types of information in real time to make the best Trading decisions possible.

Course Objectives

At the end of the course, participants will be able to:

- Understanding Psychology of a Market Cycle
- Cryptocurrency Trading Strategies That You Can Start Implementing Today.
- OrderFlow and How to Read The OrderBook.
- Short Selling and How to Implement Shorting within a Strategy.
- How to Properly use Technical Analysis.
- Advanced Risk Management & Money Management Techniques.
- How to Analyse Historical Performance To Optimize Your Performance.

Targeted Audience

- Software developers
- Engineers
- Finance managers
- Crypto investors
