EPCIC Contract Management in Offshore & Marine

REF: U845 DATE: 14 - 18 October 2024 Venue: Baku (Azerbaijan) - Holiday Inn Baku Fee: 5830 Euro

Introduction:

EPCIC Engineering, Procurement, Construction, Installation & Commissioning Contract is the most commonly used form of the construction contract. In particular for complex projects, the preferred contract module that is used is EPCIC. Mastering the ins and outs of EPCIC contracts will prove to be an essential tool in driving effective contracting strategies to minimize delays, cost overruns, and liability issues.

This EPCIC Contracts Management in Offshore & Marine training course for both Offshore and Marine is specifically designed to address the key issues as it relates to all the parties and stakeholders who are involved in the execution of the contract. and as to the best means available to allocate and manage their risk and liabilities. Under an EPCIC model, the main contractor carries the risks for the project, they must, at the same time minimize these risks through effective contracting strategies.

Course Objectives:

At the end of this course the participants will be able to:

- Understand the current global, local and financial environment for EPCIC contracts and assess operational, commercial, legal and financial risks in EPCIC contracts
- Examine and analyze the difference between with EPCIC contracts & EPCM and appreciate the underlying legal principles
- Appreciate the essential element of the different contract stages from pre to post tender to completion and delivery of project
- Address key issues faced during the project lifecycle and how to tackle these through enforceable contractual clauses
- Avoid drafting pitfalls and ambiguous contractual terms
