Managing Health and Safety in the Workplace

REF: S368 DATE: 20 - 31 May 2024 Venue: Madrid (Spain) - Fee: 8775 Euro

Introduction:

Health and Safety in the Workplace provide those in managerial and supervisory positions with appropriate knowledge and understanding of the issues involved. You will learn how to reduce costs and improve profits with effective safety management.

Health and safety technology and procedures are very important aspects of health and safety management. However, on their own, these will not provide a continuous improvement in health and safety performance. It is necessary to have personnel with a sound understanding of the areas that can give rise to losses. The course covers all the basic areas of Safety in the Workplace such as Safety Management, Safety Culture, Workplace Equipment, Hazardous agents, and Legislation.

Course Objectives:

At the end of this course the participants will be able to:

- Define the sources of harmful acts.
- Understand and accept that safety is a function whereby everyone is responsible.
- Establish that accidental injuries are caused by unsafe acts, behavior, and conditions.
- Perform job safety analysis and give job safety instructions.
- Conduct an accident investigation and fill a meaningful accident report.
- Handle and react to various work accidents and emergencies.

Targeted Audience:

Managers, supervisors, and safety professionals who wish to improve their skills and competencies to be able to assume their safety responsibilities and effectively carry out their tasks safely in their organization.
