Managing Contractual Liabilities

REF: U830 DATE: 29 July - 2 August 2024 Venue: London (UK) - Landmark Office Space Fee: 5300 Euro

Introduction:

Every commercial transaction carries risk: your organization can manage risk by contractually determining the nature, content, and consequences of both yours and the other party's actions and omissions. Contracts give rise to a range of liabilities by parties assuming rights, responsibilities, duties, and obligations, but which can be managed through contractual mechanisms.

This highly interactive Managing Contractual Liabilities training course considers how your organization can identify and manage key contractual risks and liabilities - what are they, what do they mean, what are the consequences, who takes the risk, and who pays? It focuses on how best to deal with key contractual liability issues to minimize your potential exposure to both the financial consequences and damage to your reputation

Course Objectives:

At the end of this course the participants will be able to:

- Identify when a contract becomes legally enforceable
- Assess and manage key contractual liabilities
- Analyze the way indemnities operate across industries
- Evaluate the need and use of different types of insurance
- Compare ways of dealing with claims and disputes

Targeted Audience:

- Contracts Engineers
- Project Managers
- Procurement and Purchasing Staff
- Finance and Audit Professionals
- Anyone involved in the management of risk
