Equipment Care in Oil and Gas Production

REF: E425 DATE: 27 October - 7 November 2024 Venue: Online - Fee: 3750 Euro

Introduction:

This training program offers comprehensive instruction on the operation, diagnostics, and maintenance of equipment used in oil and gas production operations. Through it, participants will be equipped to effectively operate, diagnose issues, and perform routine maintenance on equipment critical for oil and gas production processes.

Program Objectives:

At the end of this program, participants will be able to:

- Develop an understanding of the accounting standards, policies, and practices used by companies in the Oil & Gas Exploration & Production industry.
- Appreciate the nature and financial implications of Production Sharing Contracts and other agreements between host governments and international companies.
- Examine issues and guidelines in accounting for Joint Ventures.
- Identify and know how to apply international and national accounting standards most relevant to the E&P industry.
- Improve the relevance and reliability of financial reports to better meet the needs of users.
- Review and use publicly available information for benchmarking the business performance of companies in the E&P industry.

Targeted Audience:

- The operation, technical service, and maintenance professionals.
- Technical professionals responsible for the maintenance and repair of equipment.
- Professionals involved in inspection and maintenance and repair.
- Technical professionals dealing with risk assessment and integrity analysis.
- Technicians dealing with regulating and metering and other measurements.
