Fundamentals of Excellence in Information Technology Management

REF: B1766 DATE: 26 - 30 August 2024 Venue: Casablanca (Morocco) - New Hotel Fee: 4290 Euro

Introduction

Managing an IT function is different from developing or supporting IT solutions, where general management skills are useful for an IT manager, but the findings from this course show that this course specifically designed for the IT professional is invaluable.

There are five main modules covering IT Strategy, Project Excellence, Communication Technology, Operations and Crisis Management and Business Acumen. These are the five management skills that have been identified as consistently enabling business results and career success for all IT managers.

Course Objectives

At the end of this course the participants will be able to:

- Develop an effective IT strategy.
- Increase project delivery rates and manage portfolio of projects.
- Establish clear goals for information technology.
- Effective negotiation and technical agreements.
