Conference: ISO Business Continuity Management System 22301:2019 Transition

8 - 12 December 2024
Dubai (UAE)

Conference: ISO Business Continuity Management System 22301:2019 Transition

REF: C2144 DATE: 8 - 12 December 2024 Venue: Dubai (UAE) - Fee: 5310 Euro

Introduction

Because of how quickly consumer needs, the environment, and market conditions change, ISO 22301 recently underwent a revision. As a result, in order to address both present and upcoming business continuity concerns, the standard's requirements have been changed.

The "ISO 22301:2019 Transition" conference gives you in-depth knowledge about the updated clauses, additional and removed terminology, reduced prescriptiveness of the standard, etc., and aids in your comprehension of how ISO 22301:2012 and ISO 22301:2019 differ from one another. You will be able to gain the knowledge you need to assist an organization in planning and implementing the ISO 22301:2019 modifications through this conference, helping to hasten the process of switching from an ISO 22301:2012 BCMS to an ISO 22301:2019 BCMS.

You can apply for a "Certified ISO 22301:2019 Transition" credential after passing the test and passing the exam after becoming familiar with the new ideas and requirements of ISO 22301:2019. Having a Transition Certificate will demonstrate that you possess the professional skills and real-world knowledge necessary to successfully implement the changes made by ISO 22301:2019 to an existing business continuity management system BCMS in any organization.

Conference Objectives:

At the end of this conference, the participants will be able to:

- Participants in an ISO 22301:2019 BCMS transition process, such as managers, instructors, or consultants
- Individuals in charge of implementing the changeover from an ISO 22301:2012 BCMS to an ISO 22301:2019 BCMS
- Auditor candidates aiming to complete the ISO 22301:2019 transition certification

Targeted Audience:

- Project managers and business continuity consultants
- Experts with extensive experience attempting to develop a business continuity management system
- Individuals in an organization who are in charge of maintaining compliance with BCMS requirements
- Team members of the BCMS
