Kuala Lumpur (Malaysia)

Summer School on Labor Economics for Development

REF: F2030 DATE: 24 - 28 June 2024 Venue: Kuala Lumpur (Malaysia) - Fee: 5300 Euro

Introduction:

This 5-day summer school is designed to provide participants with an in-depth understanding of the key concepts and theories of labor economics as they relate to development. The course will cover a range of topics including labor market dynamics, wage determination, labor market policy, and the impact of globalization on labor markets. The course will be interactive and will include lectures, discussions, and case studies.

Course Objectives:

At the end of this course, the participants will be able to:

- Understand the key concepts and theories of labor economics as they relate to the development
- Learn about labor market dynamics and how they impact economic growth and development
- Analyze the determinants of wages and employment in developing countries
- Understand the role of labor market policies in promoting economic growth and development
- Study the impact of globalization on labor markets in developing countries
- Analyze labor market data and policies using statistical software
- Develop the ability to critically evaluate and design labor market policies

Targeted Audience:

- This course is designed for graduate students, researchers, and professionals working in the field of development economics, labor economics, and related fields.
