Tax Policy Analysis and Tax Revenue

REF: TR1919 DATE: 14 - 25 July 2024 Venue: Sharm El-Sheikh (Egypt) - Sheraton Sharm Hotel, Resort, Fee: 5985 Euro

Introduction:

This course aims to increase participants' understanding of the major difficulties that governments encounter when creating, implementing, and overseeing a contemporary tax system. It provides a succinct explanation of the theoretical foundations of tax policymaking and goes into great detail on its application and practice with a focus on the region the course is intended for.

Program Objectives:

At the end of this program, the participants will be able to:

- Explain the fundamentals of policy formulation and how they affect tax administration, providing connections between the two and demonstrating how their responsibilities are interconnected.
- Review design issues for significant taxes that make up modern tax systems such as broad-based consumption and income taxes, property taxes, excises, and small business tax regimes, as well as approaches to tax policymaking in particular economic and institutional contexts, such as resource-rich countries, fragile countries, and countries in economic blocs/customs unions, as well as international taxation such as taxation of the digital economy.
- Use experiences from the region and beyond to discuss the structure, management, and administration of tax administrations.
- Give a summary of current concerns in tax administration and policy, as well as the effects they have on tax systems worldwide.

Targeted Audience:

- Tax policymakers and analysts.
- Government officials involved in revenue management.
- Tax professionals and consultants.
- Researchers and academics specializing in tax policy and revenue analysis.
- Financial planners and economists interested in taxation.

Unit 1:
