Supply Chain Security Management System: ISO 28000 Lead Auditor

REF: L2010 DATE: 19 - 23 August 2024 Venue: London (UK) - Landmark Office Space Fee: 5850 Euro

Introduction

Applying widely accepted audit concepts, methods, and methodologies, ISO 28000 Lead Auditor training helps you to get the competence needed to conduct a Supply Chain Security Management System SCSMS audit. You will learn the knowledge and abilities necessary to organize and carry out internal and external audits in accordance with ISO 19011 and ISO/IEC 17021-1 certification procedure throughout this training session.

You will be able to learn audit methodologies through practical exercises and develop your management skills for an audit team, audit program, customer relations, and conflict resolution.

You can take the exam and submit an application for a "Certified ISO 28000 Lead Auditor" credential after gaining the knowledge required to conduct this audit. Possessing a Lead Auditor Certificate will show that you are qualified to audit firms in accordance with best practices.

Course Objectives

At the end of this course, participants will be able to:

- Recognize the workings of an ISO 28000-based supply chain security management system.
- Recognize how ISO 28000 relates to other standards and regulatory systems.
- Recognize the responsibilities of an auditor in planning, directing, and following up on an ISO 19011 management system audit.
- Study audit leadership and audit team management.
- Discover how to understand the ISO 28000 specifications in the context of a SCSMS audit.
- Develop the skills necessary to be an auditor, including the ability to organize audits, supervise audits, write audit reports, and follow up on audits in accordance with ISO 19011.
