# Managerial Accounting: Information for Planning, Decision Making and Control

REF: F1309 DATE: 2 - 13 September 2024 Venue: Cambridge (UK) - Fee: 9915 Euro

## Introduction:

Managerial accounting is an activity that provides financial and non-financial information to business managers and other internal decision-makers of an organization. This course examines how managerial accounting information is gathered, and how it is used by business professionals to make effective plans & decisions. Lessons such as fundamentals of managerial accounting cost accounting concepts, and managerial accounting approaches will provide you with the concepts, procedures, and analytical skills you'll need to make informed decisions in today's challenging business world.

Managerial accounting is not as widely used as other forms of accounting, nor is it as known. While companies concern themselves with financial accounting methods like audits, budgets, and financial statements, they often completely ignore the forward-thinking methods of managerial accounting.

## Course Objectives:

At the end of this course the participants will be able to:

- Use financial information for guiding decisions
