RPA

A group of four smiling professionals, two men and two women, are seated around a table in a meeting. The woman in the foreground is wearing a black top and a beaded necklace. The background is blurred, showing an office environment.

RPA

REF: B2221 DATE: 30 September - 4 October 2024 Venue: Amsterdam (Netherlands) - Fee: 6145 Euro

Introduction:

Robotic Process Automation RPA is a technology that uses software robots to automate repetitive, rule-based tasks in business processes. This 5-day training course will provide participants with a comprehensive understanding of RPA and its benefits, along with practical examples of how to design, develop, and deploy RPA solutions.

Course Objectives:

By the end of this course, participants will be able to:

- Understand the basics of RPA and its principles
- Design and develop RPA solutions using best practices
- Implement RPA tools for automation of business processes
- Use RPA for process optimization and efficiency
- Use tools for monitoring and troubleshooting RPA solutions

Targeted Audience:

This course is designed for IT professionals, software developers, and business analysts who want to learn about RPA and its implementation.

Course Outlines:

Unit 1: Introduction to RPA

- Overview of RPA
- Benefits and challenges of RPA
- RPA principles and practices
- RPA use cases and applications
- RPA vendors and tools

Unit 2: RPA Design and Development

- RPA architecture and components
- Designing RPA solutions using best practices
- Developing RPA solutions with UiPath
- Developing RPA solutions with Automation Anywhere
- Testing and Debugging RPA solutions

Unit 3: Implementing RPA for Business Processes

- Automating business processes with RPA
- Integrating RPA with other systems and applications
- Using RPA for process optimization and efficiency
- RPA for data entry and management

- RPA for customer service and support

Unit 4: RPA Deployment and Management

- RPA deployment strategies
- Deploying RPA solutions with UiPath and Automation Anywhere
- RPA Orchestration and Control
- RPA Security and Compliance
- RPA Monitoring and Management

Unit 5: Monitoring and Troubleshooting RPA

- RPA performance monitoring and metrics
- Troubleshooting RPA solutions
- RPA Error Handling and Recovery
- RPA Analytics and Reporting
- Best Practices for RPA Implementation
