Project Management Tools and Techniques

REF: P2165 DATE: 5 - 9 May 2024 Venue: Cairo (Egypt) - Fee: 3520 Euro

Introduction

A Project Management Tools and Techniques program is a training program focused on familiarizing participants with a diverse array of tools and methodologies essential for effective project management. It covers a wide range of software applications, techniques, and frameworks commonly used in the project management field, including Gantt charts, critical path analysis, and agile methodologies. Through hands-on training and practical exercises, participants learn how to leverage these tools and techniques to plan, execute, and monitor projects efficiently, enhancing their ability to deliver successful outcomes within scope, time, and budget constraints.

Program Objectives:

At the end of this program, the participants will be able to:

- Identify and prioritize project requirements to ensure successful delivery and stakeholder satisfaction.
- Apply best practices to plan and run a project successfully using proven project management processes.
- Implement risk management tools and techniques for the identification, analysis, and development of strategies.
- Estimate resources and budgets, and schedule task work and duration with confidence.

Targeted Audience:

- Project managers and team leaders.
- Program managers.
- Project coordinators.
- Business analysts.
- Team members assigned to projects.
- Project control professionals.
- Operations managers.
- IT managers.
