Management Systems Internal Auditor Based on ISO 19011

REF: A1821 DATE: 19 - 23 August 2024 Venue: London (UK) - Landmark Office Space Fee: 5300 Euro

Introduction

ISO 19011 is defined as the standard that sets forth guidelines for auditing management systems. The standard contains guidance on managing an audit program, the principles of auditing, and the evaluation of individuals responsible for managing the audit programs. An audit program consists of the arrangements made to complete all of the individual audits needed to achieve a specific purpose.

This course provides valuable information on how to improve an audit program systematically, just as other departments in an organization are expected to improve. One aspect of such improvement is continuously ensuring the audit program objectives are in line with the management system policies and objectives. Organizations, in pushing for auditing improvements, should consider the needs of customers and other interested parties.

Course Objectives

At the end of this course the participants will be able to:

- Interpret and apply the requirements of a management system as it applies to the context of the organisation, audit objective, criteria, and scope of the audit
- Define the audit objective, scope, and criteria
- Plan the audit, develop schedule, checklists, sampling plan, and other work documents
- Execute the audit professionally and efficiently - observe work practices, review documented information, interview relevant personnel
- Collect and evaluate evidence, report non-conformities, and verify corrective action
- Communicate effectively while respecting confidentiality, security, personal, and proprietary information

Targeted Audience

- Auditors
- Managers
- Management representatives
- Consultants
- People tasked with administering management systems
- Beginners looking for a career in auditing
- ISO professionals

Course Outline

Unit 1: Introduction

- Scope
- Normative references
