Understanding Finance to Influence Strategic Decisions

REF: F176 DATE: 25 - 29 November 2024 Venue: Cambridge (UK) - Fee: 5830 Euro

Introduction:

A good understanding of strategic analysis and decision-making and the links between these and finance enables all managers at every level to make better strategic decisions and achieve improved performance.

This course has been designed to build on the theoretical framework by developing practical tools and techniques for analyzing and evaluating strategic alternatives and making strategic financial decisions.

Course Objectives:

At the end of this course the participants will be able to:

- Develop strategic thinking
- Use the strategic management process to develop missions and objectives and carry out strategic analysis and decision-making
- Forecast financial data using various Excel models
- Understand the structure of the income statement, balance sheet, and cash flow statement, and analysis of the cash operating cycle, for improved financial performance, and better management of working capital and cash flow
- Identify the alternative sources of finance and financial or capital structure, and evaluate the models of optimum capital structure and minimization of the weighted average cost of capital WACC
- Use the technique of discounted cash flow DCF for capital budgeting and evaluation of capital project investment, using net present value NPV, internal rate of return IRR, equivalent annual cost EAC, and the profitability index PI
- Use the techniques of uncertainty analysis and risk analysis and develop appropriate risk management tools of insurance and hedging of interest rates and foreign currency exchange rates.
- Understand the influence of financial considerations on an organization's strategic decision-making
- Improve their self-confidence in dealing with finance and financial professionals
- Coordinate effectively with other professionals on financial issues.
